

Our Art and Design Technology Subject

My name is Mrs Barrett and I am the Art and Design Technology Subject Leader.

My passion/ personal experience with my subject.

I have loved Art and Design Technology as long as I can remember. I remember these subjects so fondly from my school days and feel this is so important for our children to develop skills and enjoyment in these areas. As part of this, we have been able to arrange a trip for every child from year 1 to 6 to visit a local Art Gallery and I am passionate about ensuring children know about these places and visit them.

Experiences in our school

Within our school, we have a knowledge- rich curriculum to embed in our pupil's knowledge of the Art and Design Technology. Each unit begins with a study of a famous artist or engineer to help inspire the children and develop an understanding of influential and inspirational people. Our topics link in with other subjects the children have covered to help them to make meaningful links in their learning. Children in our school enjoy Art and Design Technology lessons and the challenges these bring.

Hopes and goals in my subject

I hope that Art and Design Technology is brought to life for our pupils, and that it is exciting and memorable!

I hope that our Art curriculum broadens our children's minds and shows them that art is relevant to their lives.

I hope that our Design Technology curriculum broadens the skills children will need to live independent, healthy lives.

I am looking forward to planning more activities linked to Art and Design Technology in the form of visits and specialist visitors into school.
