

Chicken Pox

Dear Parents/ Carers,

We are writing to inform you that we have more than one confirmed case of chicken pox in EYFS and KS1. Therefore, we would like to take this opportunity to remind you of the procedure for when to keep your child at home and when it is appropriate to send them back to school, should your child develop the symptoms.

Chicken pox is a mild and common childhood illness caused by a virus called varicella zoster. It is most common in children under the age of 10 and is contagious. The person is contagious from 1 to 2 days before the spots appear until the spots have crusted over (usually 5-6 days after the spots appear). Groups of people that are most at risk of serious problems if they catch chicken pox are newborn babies, pregnant women and those with a weakened immune system. Therefore, it is important, if your child has chicken pox, to keep them at home whilst they are contagious.

If we suspect a child has chicken pox at school, parents will be contacted and asked to collect them. All children should remain at home until **all** chicken pox spots have crusted over to avoid further spread of the illness. To seek further advice please contact your GP.

We appreciate your understanding on this.

Mrs L Whittaker
 Executive Headteacher
